### Final Project Pirple

Hello everyone!

HTML (the Hypertext Markup Language) and CSS(Cascading Style Sheets) are two of the core technologies for building Web pages. HTML provides the *structure* of the page, CSS the (visual and aural) *layout*, for a variety of devices. Along with graphics and scripting, HTML and CSS are the basis of building Web pages and Web Applications

This is my attempt to replicate the Wikipedia webpage, using the tools that I learned in Pirple.com

HTML Code:

```
<!DOCTYPE html>
```

```
<html lang="en"> <head> <meta charset="UTF-8"> <meta name="viewport" content="width=device-width, initial-scale=1.0"> <link rel="stylesheet" href="project2styles.css"> <link rel="stylesheet" href="https://cdnjs.cloudflare.com/ajax/libs/font-awesome/4.7.0/css/font-awesome.min.css"> <title>Document</title> </head> <body> <div id = "div0"> <br><br> <p class= "WikiFont0"><span class = "WASpan">W</span>IKIPEDI<span class="WASpan">A</span></p> <p class= "WikiFont1">The Free Encyclopedia</p><br><br> </div>
```

```
<div> <table class="langTable" style="width:100%"> <tr> <td class = "lang1">English</td> <td class = "lang2">Polski</td> </tr> <tr> <td class = "lang1art">6 183 000 + articles</td> <td class = "lang2art">1 435 000 + hasel</td> </tr> </table><br> <table class="langTable" style="width:100%"> <tr> <td class = "lang3">Español</td> <td class = "lang4">日本人</td> </tr> <tr> <td class = "lang3art">1 637 000 + artículos</td> <td class = "lang4art">1 235 000 + 記事</td> </tr> </table><br> <table class="langTable" style="width:100%"> <tr> <td class = "lang5">Deutsch</td> <td class = "lang6">Русский</td> </tr> <tr> <td class = "lang5art">2 495 000 + artikel</td> <td class = "lang6art">1 672 000 + статьи</td> </tr> </table><br> <table class="langTable" style="width:100%"> <tr> <td class = "lang3">Français</td> <td class = "lang4">Italiano</td> </tr> <tr> <td class = "lang3art">2 262 000 + articles</td> <td class = "lang4art">1 645 000 + voci</td> </tr> </table><br> <table class="langTable" style="width:100%"> <tr> <td class = "lang1">中文</td> <td class = "lang2">Português</td> </tr> <tr> <td class = "lang1art">1 155 000 + 文章</td> <td class = "lang2art">1 045 000 + artigos</td> </tr> </table><br>
```

```
<div> <form class="searchform"> <input type="text" name="search2"> <button type="submit"><i class="fa fa-search"></i></button> </form> </div><br><br> <div> <span>-----</span> <span id = "textBox">Read wikipedia in your language</span> <span>-----</span> </div> </div> </body> </html>
```

CSS Code:
